Samira Benali

Junior Software Engineer - Manchester, United Kingdom
samira.benali@example.com

Fictional person: this CV is sample data written for DocQuery.

Profile

Junior backend developer with a master's degree in computer science and six months of industry experience building REST services in Java and Spring Boot. Interested in reliable, well-tested backend systems and in developer tooling.

Experience

Software Engineering Intern - Northgate Logistics, Manchester (June 2024 - December 2024)
- Built Spring Boot REST services for shipment tracking used by 40 internal users.
- Reduced the average response time of the tracking API by 30 % by adding database indexes and caching.
- Wrote integration tests with JUnit 5 and Testcontainers; raised test coverage from 45 % to 78 %.
- Took part in code reviews and on-call handovers with the platform team.

Teaching Assistant - University of Leeds, School of Computing (October 2023 - May 2024)
- Ran weekly lab sessions on object-oriented programming in Java for first-year students.

Education
MSc Computer Science, University of Leeds, 2025 - graduated with merit.
Dissertation: route optimisation for urban parcel delivery.
BSc Mathematics, University of Lyon, 2022.

Skills
- Languages: Java 21, Python, SQL, TypeScript.
- Frameworks and tools: Spring Boot, Angular, PostgreSQL, Docker, Git, GitHub Actions.
- Practices: test-driven development, REST API design, code review.

Certifications
Oracle Certified Professional: Java SE 17 Developer (2025).

Projects
ParcelPath - an open-source route planner for delivery bikes written in Python, using OpenStreetMap data. About 200 stars on GitHub.

Languages
French (native), English (fluent), Arabic (conversational).
